### DETAILED ACTION

1. Claims 1 and 3-6 are presented for further examination.

#### ***Claim Objections***

2. Claims 1 and 3 should have all instances of references numerals removed from the claims, as they are not relied upon in determining patentability.

Claim 3, line 1, "that controls a joystick" should read "that controls a solenoid".

#### ***Allowable Subject Matter***

3. Claims 1 and 3-6 are allowed.

As per claims 1 and 3-6, specifically independent claims 1, 3 and 4, the prior art of record fails to teach or adequately suggest a signal processor for use in a manually operable input arrangement (joystick, as per claims 1 and 3) which controls a solenoid, wherein in response to movement from a neutral position, a momentary predetermined maximum current corresponding to a threshold current value is allowed to flow through the solenoid, including the use of averaging voltage values over predetermined time periods, in combination with the other claimed features and or limitations as claimed by the claimed invention.

#### ***Conclusion***

4. This application is in condition for allowance except for the following formal matters, as outlined above in the Objections Section.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
